

Instructions for Truck Drivers

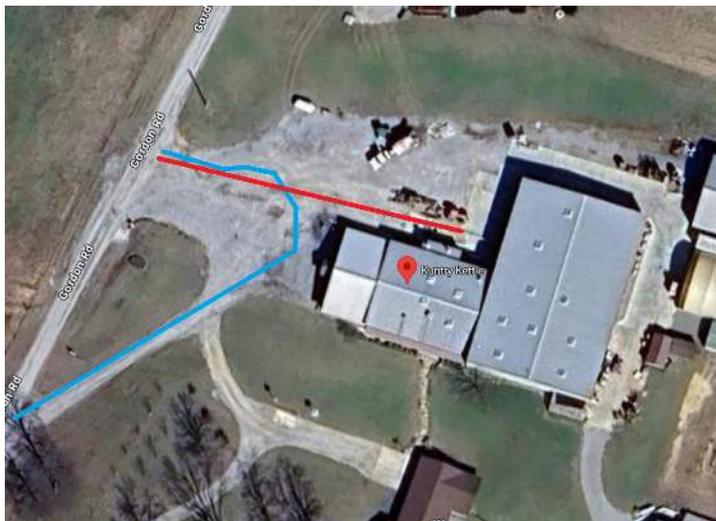

Our facility is somewhat remote, but the dock is easy to reach if you know what to expect.

Directions:

- Turn onto **Gordon Rd. only from Little Kinkaid Rd.** Other routes are not suitable for trucks.
- After turning onto Gordon Rd., you'll immediately go down a steep hill, cross a small bridge, and then begin heading uphill again. About one-third of the way up the hill on the right, you'll see an **angled driveway marked "Kuntry Kettle Truck Entrance."**
- The bridge at the bottom of the hill on Gordon Rd. is rated and safe for **fully loaded 80,000 lb semis.**

Dock Access:

- Follow the path shown in the illustration below to reach the dock.

Blue line: forward path for trucks.

Red line: backing path into the dock.

- The **Driver Entrance is Door A.**
Inside the door, you'll find a **help button** next to the **dock leveler control.**
- You may also call **618-426-1600 ext. 178** for assistance.

Winter Weather Advisory:

During inclement winter weather, we recommend the following route for safest access:

State Route 4 → Rock Crusher Rd. → Little Kinkaid Rd. → Gordon Rd.

All other routes may be risky or impassable in poor conditions.
